

Z17 EVOLUTION PLUS

STOCK REPLACEMENT BRAKE UPGRADE

The PowerStop Z17 Evolution Plus ceramic brake pads feature a ceramic formula designed to maximize stopping power while reducing brake dust & eliminating noise. Using OE positive mold technology along with a thermal scorched pad surface, Z17 pads maintain consistent wear and performance while ensuring a fast break-in.

- Low-dust ceramic formula designed to maximize stopping power and keep wheels clean
- Positive mold technology for consistent wear and performance
- Thermal scorched pad surface for a fast break-in
- Chamfered and slotted to ensure noise-free braking
- Powder coated backing plate resists rust and corrosion to provide extended pad life
- Multi-layer rubberized shims provide virtually noise-free braking

PREMIUM HARDWARE IN EVERY BOX!

Premium stainless-steel hardware kit included for easy, problem-free installation.

Z36 TRUCK & TOW

SUPER-PREMIUM BRAKE UPGRADE FOR TRUCKS & TOWING

PowerStop Z36 Truck & Tow Carbon-Fiber Ceramic brake pads are designed as an upgrade over stock brakes to reduce brake dust & eliminate noise for those that tow and haul, as well as the off-road enthusiast. These brake pads are made with a low-dust ceramic formula, infused with carbon-fiber, to provide severe-duty stopping power for trucks and SUVs.

POWDER COATED BACKING PLATE

Powder coated to help prevent rust & corrosion.

PREMIUM HARDWARE

Premium stainless-steel hardware kit included for easy, problem-free installation.

(Where Applicable)

NOISE INSULATING SHIMS

Premium stainless-steel shims provide virtually noise-free braking.

NEXT GEN & NEXT GEN EURO

SUPER-PREMIUM BRAKE UPGRADE FOR LUXURY & PERFORMANCE VEHICLES

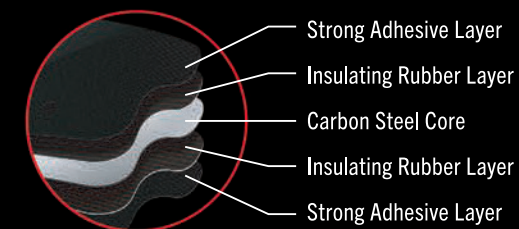

PowerStop is proud to introduce Next Gen as a super-premium friction offering for luxury and performance passenger cars. Next Gen Euro addresses the noise and dust complaints associated with European vehicles, without sacrificing performance. The Dual-Grip™ Shim Technology helps prevent Disc Thickness Variation (DTV) to minimize pedal pulsation and ensure a smooth, quiet ride.

FRICTION FORMULA

- Carbon-Fiber Ceramic
- 100% Copper-Free

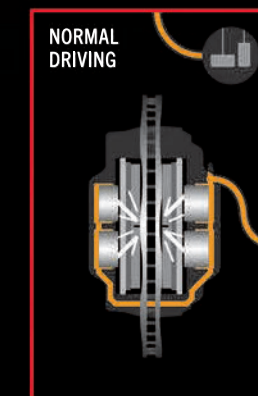

CHARACTERISTICS

- Superior Stopping Power
- Noise-Free Performance
- Low-Dust

FEATURES

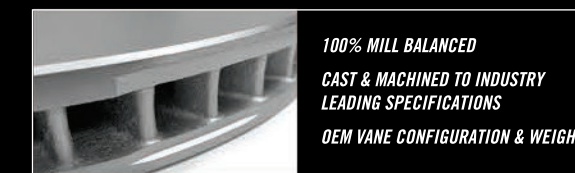

- Equipped With Dual-Grip™ Shim Technology
- Thermal Scorched For Fast Break-In
- Positive Mold Technology
- Premium Stainless-Steel Hardware Kit Included

Without Dual-Grip™ shims, brake pads may drag on rotors and create DTV

The entire brake rotor is treated with a thin layer of Genuine GEOMET® 360 coating which protects against rust and corrosion without influencing the vehicle's braking performance. The aluminum silver color of GEOMET® 360 integrates perfectly with the style and design of today's open alloy wheels.

PowerStop Drilled & Slotted rotors provide a bolt-on upgrade for improved brake cooling and performance. These rotors are precision cross-drilled for maximum cooling and performance during extreme conditions; rounded slots sweep away gasses, dust, and moisture to keep a clean friction contact patch on the rotor surface. Our Drilled & Slotted rotors also use silver zinc dichromate plating to resist rust and corrosion.

Drilled & Slotted for Maximum Cooling and Plated to Help Protect Against Rust
